twentieth

Special Edition Lighthouse

Established & Sons

DESCRIPTION

Lighthouse combines Venetian hand-blown glass with industrially engineered aluminium and sculptural marble to create an enduring contemporary classic.

To celebrate its 10-year collaboration with Ronan and Erwan Bouroullec, Established & Sons presents this iconic light in two rare marbles.

The new Lighthouse bases are produced in Rouge Du Roi and Dark Emperador marble – materials that are increasingly rare and difficult to obtain. The characteristic swirls and veins of the two types of marble make each light unique.

ADDITIONAL INFORMATION

Anniversary Issue 2019

Dark Emperador Marble, Amber Venetian Blown Glass Shade:
One of the most famous and internationally recognized Spanish stones, Dark Emperador marble combines an intense deep brown color with warm hazelnut, cream and green veins. The distinctive combination of color and pattern lends elegance and sophistication to any interior.

Rouge du Roi Marble, Light Grey Venetian Blown Glass Shade: Quarried in France, Rouge du Roi marble is among the most expensive natural stones in the world due to its rarity. Shot through with white veins and knots, the deep-red base color adds an unexpected warm tone that contrasts with the cool stone surface.
