Mobius Light

Scott Daniel Design

DESCRIPTION

The Mobius Light by Scott Daniel Design. A long narrow strip of mesh is wrapped, twisted, and interwoven around itself. Sometimes a fixture begins as a 25' long ribbon of mesh. The wrapped form is never predetermined, and never the same twice. These unique shapes draw the viewer in, like following a curved road and wondering where it leads, this is one of our most sought after designs.

Brass light cluster with Bronze Patina or Polished Nickel

LIGHTING

x3 or x5 lamp cluster, E26 medium base sockets

40W Clear T10 (Bulbrite) bulbs included

DROP

Shown suspended by single metal stem

Available suspended by metal cable with wire exposed

PROCESS

Inspired by the concept of Alchemy – combining basic elements to create something of great value - Cmesh was developed through an experimental artistic process. Clay and metal, normally incompatible materials, were combined in numerous ways and tested extensively until the process was developed and refined.
