twentieth

Meltdown Pp Rope White Chair

Tom Price

DESCRIPTION

Meltdown Chair: PP Rope White is created by heating and pressing a seat-shaped former into a ball of polypropylene rope. The rope begins to liquefy as it comes into contact with the heated former and, as it cools, it sets in the shape of a seat creating a contrast in form and texture to the remaining rope. No additional material has been added to make the seat - it is all made from melted rope.

ADDITIONAL INFORMATION

EDITION
8

MATERIALS:
Polypropylene rope

DIMENSIONS:
27.5"x37.4"x37.4"
