Wave Pendant Light

Scott Daniel Design

DESCRIPTION

The Wave Light by Scott Daniel Design. This fixture was created by manipulating a long sheet of mesh to reflect the undulating surface of the ocean. The form consists of two different sizes of mesh layered on each other, but as they wrap around, their alignment shifts to create a unique pattern of holes on each curved surface of the wave. Like dappled sunlight on ocean water, each fixture casts a unique pattern of light.

ADDITIONAL INFORMATION

MATERIALS

Clay, Metal

DIMENSIONS

24"dia x 18"H

Dimension variations occur naturally, +/- 1"

Custom sizes available.

*Made to order unless otherwise noted.

Variations occur naturally, no two pieces are identical.

FINISHES

Warm White Translucent Glaze

Additional finish options are available, please check the web-site or contact us by email for more information.

PROCESS

Inspired by the concept of Alchemy – combining basic elements to create something of great value - Cmesh was developed through an experimental artistic process. Clay and metal, normally incompatible materials, were combined in numerous ways and tested extensively until the process was developed and refined.
