## Museum Glass Console

Christopher Kreiling

### DESCRIPTION

The Museum Console was inspired by the Museum Bench. It's made of glass pipes, solid steel, and is strong enough to hold up to 250 pounds! The steel has a blackened patina that reads as a dark graphite gray in bright light and black in dim light. It's then coated with a matte finish to protect it from rusting. This solid industrial modern piece is definitely a conversation starter.

### ADDITIONAL INFORMATION

#### DIMENSIONS

60" W x 17.5" D x 32" H
