twentieth

Nautilus Floor Lamp

Christopher Kreiling

DESCRIPTION

The Nautilus Floor Lamp in bronze is the second addition to the Nautilus study series. The sculptural lamp stands 44 inches high made of hand-forged bronze, patinated and high polished on the face. The three-way touch sensor adds a tactile and living quality to the piece. A dimmable 200W medium base LED bulb is best. A 100W medium halogen bulb works, but one should avoid touching the top of the lamp as it will get hot. The lamp has a round black fabric covered cord and is signed on the back bottom. The Nautilus Floor Lamp is a unique alternative to a reading lamp and works well next to a sofa or lounge chair.

Also available with a copper face, or in chrome!
