Welles Textured Glass Long Chandelier

Gabriel Scott

DESCRIPTION

A new type of modular elegance, the WELLES bridges feminine and masculine sensibilities for a perfect blend of strength and sophistication. Each one of a kind glass piece is mold-blown to generate a gem like form and create a bright diffused light. Polished prong-like hardware boldly supports each glass volume and holds the body of the overall organic silhouette.

Textured glass is a new finish for Gabriel Scott's Welles Glass Series. The new textured glass finish distorts light and creates magical optical illusions when looking through the glass. Textured glass is available in three textures - bubbled, ribbed or crackled and smoked, bronze and clear color options.

All Gabriel Scott pieces are handmade in Canada.

TEAR SHEET
