twentieth

Lotus Table

James De Wulf

DESCRIPTION

The design is based on the skeletons of Radiolaria which are microscopic organisms found on the ocean ?oor. The outer edge of the table meanders in an organic way as does the leg. In this way the piece is kept human, approachable and fun.

At 60" diameter, the table weighs 400 lbs. The piece lives beautifully indoors and performs well outdoors. Tables are sealed with a unique ?nishing wax and will develop a gradual patina adding to the beauty of the material's character over time.

Standard diameters 48" / 60" / 72" / 84" available. Please inquire for custom sizing.
