twentieth

# Organic Loop Chair - Stripes

Julian Mayor

DESCRIPTION

The organic loop chair was conceived as four loops with three ‘surfaces’ represented in the mirror steel. These surfaces meet at seams that appear curved but are in fact made from angular sections.

The idea is about perception and how the eye takes in partial information and translates these clues into a solid object in the mind, much as a computer uses wireframe drawing to represent a three dimensional object in space.

ADDITIONAL INFORMATION

Title: Organic Loop (chair), stripes
Dimensions: H32.7” x W28.7” x D27.6”
Material: Wrapped fiberglass and carbon fiber
Origin: United Kingdom
Year: 2015
Editions: 20
