Diamond Chandelier

Stickbulb

DESCRIPTION

The new series of Diamond Chandeliers is a continued exploration into the timeless appeal of octahedral and hexagonal forms in nature. Stickbulb takes this classical form in a new direction by using its signature wooden bulb to echo the shape of the prized gemstone. Whereas many Stickbulb lamps rely upon cantilevered bulbs to make different linear silhouettes, Diamond is a graphic and structurally closed shape.

Bulbs are available in standard 2, 3 and 4-foot lengths which in turn create 3, 4 & 6-foot chandeliers. Custom groupings, interlocking clusters and sizes are available upon request. The wooden component is offered in sustainably sourced maple or walnut, reclaimed heart pine, ebonized oak, or reclaimed water tower redwood and the hardware finish is polished cast brass.
