28 Copper

Bocci

DESCRIPTION

28 SERIES

28 results from an innovative fabrication process that manipulates both the temperature and the direction of air flow into blown glass. The result is a slightly distorted sphere with an interior landscape of satellite shapes, including an opaque milk glass diffuser that houses either a low-voltage xenon or LED lamp.

28 COPPER

A flexible copper suspension option (in natural copper or white powder coat) is available for all 28 pendants, providing a different compositional reading and a range of sculptural forms.
