

twentieth

28 Armature

Bocci

DESCRIPTION

28 SERIES

28 results from an innovative fabrication process that manipulates both the temperature and the direction of air flow into blown glass. The result is a slightly distorted sphere with an interior landscape of satellite shapes, including an opaque milk glass diffuser that houses either a low-voltage xenon or LED lamp.

28 ARMATURE

A stainless steel armature system in a soft-touch matte black finish allows pre-composed branches to be easily connected to a series of hubs during installation.
