## 73 Stem

Bocci

### DESCRIPTION

#### 73 SERIES

The 73 is formed by blowing liquid glass into a folded and highly heat-resistant ceramic fabric vessel. The resulting shape has a formal and textural expression intuitively associated with fabric, which becomes permanent and rigid as it cools. Each 73 is completely unique in proportion, size, and shape.

#### STEM

The 73 solid brass stem system is available in unlacquered brass or powder coated black with a variety of applications. The system allows for floor, ceiling-mounted, or columnar installation. Floor and column versions can be plugged into a wall outlet and include an integral dimming system housed within a sleek brass cylinder.

#### 73 STEM FLOOR

twentieth

323.904.1200

[www.twentieth.net](http://www.twentieth.net)

The 73 series stem floor system comes in a brass or black powder coated finish and three different configurations. The semi-rigid black fabric cord includes a patented integral 360 degree dimming system housed within a sleek brass cylinder.

#### 73 STEM COLUMN

The 73 series stem column system comes in a brass or black powder coated finish, two different configurations and multiple height options. The spring loaded spike system allows for both vertical and angled installation. The semi-rigid black fabric cord includes a patented integral 360 degree dimming system housed within a sleek brass cylinder.

#### 73 STEM SUSPENDED

The 73 series stem suspended system comes in a brass or black powder coated finish and a variety of suspension options ranging from vertical ceiling-mounted stems to suspended horizontal stems. This system offers many options in terms of length and number of pendants.
