118 Series

Bocci

DESCRIPTION

Each 118 contains dozens of tiny feather-like forms in opal glass. When lit from within, these interior intricacies come into even sharper detail.

Table

118t is a single hand-blown glass pendant used with the table light hardware, which includes an integral dimming system housed within a sleek brass cylinder.

Wall & Ceiling

Mounted on a white powder-coated or brass-finish base, individual pendants can directly attach to either the ceiling or the wall.

Random

The random arrangement uses coaxial cables to suspend the pendants in ambient groupings.

Cluster

The cluster arrangement suspends the pendants from coaxial cables to compose hexagonal configurations.

Semi Rigid

The sculptural cable is a flexible suspension system that enables pendants to nestle in close-knit groups or to spread out in a wider field, allowing each piece to be perceived individually.
