twentieth

Bullion Wall Light

DESCRIPTION

The Bullion luminaire is defined by a rough sand cast body contrasted by a highly reflective mirror-polished face. The interplay between the two surfaces creates a considered duality, where light and reflection coexist in a singular architectural form.

The reflective face introduces an element of intrigue, capturing and distorting its surroundings while concealing the source of illumination. Light is revealed indirectly, casting a soft upward and downward glow, while creating a subtle halo effect around the entire fixture.

ADDITIONAL INFORMATION

MATERIAL
Cast Bronze or Cast Aluminum

FINISHES
Natural Aluminum, Blackened Aluminum, Natural Bronze, Darkened Bronze, Blackened Bronze

ELECTRICAL
13.6W, 2700k

DIMMING
Phase or Dali

CERTIFICATION
Pending Certificate

DIMENSIONS
W 2.5” x H 15.8” x D 3”

MOUNTING

Option 1: Junction Box Cover Plate.

Option 2: Junction Box render Plate (mounted directly to junction box.
