- PENDANTS: one
- MOUNTING: brass shallow canopy 116mm (4.5") in diameter x 7mm (0.3") deep
- LAMPING: 1.5w LED
- CABLE: adjustable. 3000mm (10') standard / up to 24600mm (80') maximum
- MATERIALS: blown and dipped glass, cast borosilicate glass cap, powder-coated steel and brass hardware, braided metal coaxial cable, aircraft cable, electrical components.
- WEIGHT: approximately 2kg (4.5lb)
- TRANSFORMERS: integral (transformer housed within junction box). Transformers included

DESCRIPTION

The shallow canopy in this 57 variant refers to the thin canopy depth. The shallow canopy is 116mm (4.5") in diameter and 7mm (0.3") deep. It is designed to cover a conventional North American junction box, which houses the transformer. This chandelier is designed to be horizontal, meaning that the pendant doesn't hang directly below, but instead trails off across a space, around a corner or simply deviates from its gravitational directive. As such, the pendant is designed to be hung from any number of optional swag points mounted elsewhere from the canopy.

57 is an exploration of a technique used for producing closed cell foam. The process involves trapping voids of air of different sizes and configurations within a glass matrix, yielding a shape loosely referencing a rain cloud. These pockets of air remain invisible when the piece is off, but come alive to reveal an interior universe when the piece is illuminated. By virtue of the fabrication process, each piece is completely unique.
