

GLOSSARY **CANOPIES**

CANOOPY

The term refers to a complete product to accompany a pendant fixture and suspend it from the ceiling while concealing the power termination and sometimes housing additional electrical components.

LINEAR *Family*

A long slim canopy, used for an application consisting of 2 or 3 standard pendants. Most commonly used with the ORACLE.
Available in Flush and Surface

ROUND *Family*

Circular canopy, currently ranging in 3 sizes. Available in Flush and Surface.

CHAIN *Family*

Rectangular Canopy used for chain suspended fixtures. Available in Flush and Surface.

SURFACE *Type*

A canopy with a deeper form, mounted directly on to the ceiling facade. Commonly used when the ceiling can not be altered. Available for Linear, Round and Chain

FLUSH *Type*

Visually the canopy is flat and is mounted flush with the ceiling. This altering the ceiling during installation, including creating a precise cavity to house all the canopy components. Available for Linear, Round and Chain

LARGE *Size*

Used where the PSU and Dimmer are integral. Available in Flush and Surface.

MEDIUM & SMALL *Size*

Used where the PSU and Dimmer are remotely located to canopy. Medium available in Flush and Surface. Small only available in Flush.

TWIN & TRIPLE *Configuration*

Referring to the Linear canopy, this term indicates how many fixtures are suspended from the single canopy. Available in Flush and Surface.

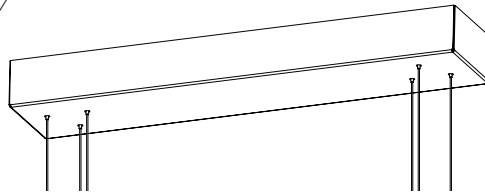

ROD & 1, 3, 5 POINT *Configuration*

This term indicates the method of suspension, be it a rod or multiple suspension wires.

MAGICAL *

This term indicates the absence of a power cable, as 2 of the suspension cables are live and power the fixture. Magical canopies are only compatible for Magical Fixtures (ORACLE)
