SALES@TWENTIETH.NET

The Bullion luminaire is defined by a rough sand cast body contrasted by a highly reflective mirror-polished face. The interplay between the two surfaces creates a considered duality, where light and reflection coexist in a singular architectural form.

The reflective face introduces an element of intrigue, capturing and distorting its surroundings while concealing the source of illumination. Light is revealed indirectly, casting a soft upward and downward glow, while creating a subtle halo effect around the entire fixture.

Cast in bronze or aluminium and meticulously finished in a range of patina finishes, the wall light celebrates the inherent qualities of its materials. The permanence and weight of the cast body are offset by the elusive, almost immaterial quality of reflection, giving Bullion a distinctive presence that brings depth, contrast and a quiet sophistication to its surroundings.
