Solace is a luminous glass tear that transforms with movement, revealing two distinct identities in light and form. Through the exploration of geometric form, the interplay of two perpendicular, intersecting circles serve as the foundation for this intricate composition.

Visually enchanting, Solace emerges from a series of experiments that use innovative engineering and push the boundaries of traditional glassblowing techniques. Through the blowing process, each complex shape develops a distinct, subtly textured glass surface, making every light truly one of a kind.
