**Provided Supplies:**

- Harlow Sconce fixture
- Universal T-bar
- Installation Screws
- LED Driver
- Spare LED chip

**Required Tools:**

- Screwdriver
- 4x 2-pole Wiring Terminals, screw or screwless, 12-18AWG (1.0-2.5mm<sup>2</sup>), rated for 600V, 15A - EX: WAGO 222-412
- Requires LED driver; Input: Local Line Voltage, Output 12Vdc SELV, 5A, Max 60 Watt, Class 2 LED Driver.

**STEP  
1**

Shut-down associated electrical breaker and wire LED driver to power source. Then secure driver in junction box using provided universal T-bar.

**STEP  
2**

Remove the glass retainer by unscrewing both screws as shown below.

**STEP**  
**3**

Remove the light bulb assembly from the fixture.

**STEP**  
**4**

Slide the glass into the fixture and screw the glass retainer back in its place.

**STEP**  
**5**

Once the glass is installed, reinstall the bulb assembly through the opening at the bottom of the fixture.

**STEP**  
**6**

Once steps 1 thru 4 are complete, instal the light fixture on to the junction box by threading the four supplied nuts on to the T-bar.
