Glass is poured into a hemispherical mold. As the glass cools, a meniscus shape forms on the open face of the piece. Two of these pieces are joined to form an articulated sphere, with the two voids in the middle yielding a certain optical quality. A cylindrical void passes through both hemispheres and houses a light source.

**Lamping**

1.5w LED or 10w xenon

**Material**

cast glass, blown borosilicate glass, electrical components

**Patent**

US Patent # D556, 361

EU Patent # 000518394-0001

LOW VOLTAGE LUMINAIRE  
E476186

±102 mm

Wall and Ceiling

Random

Adjustable length

Adjustable up to 3000 mm standard

Adjustable up to 30500 mm custom

All dimensions are in millimeters (mm) unless otherwise specified.

# 14 Series — Random

Random  
Non-adjustable length

Non-adjustable length up to 3000 mm standard

Non-adjustable length up to 30500 (100') custom

Non-adjustable length up to 3000 mm standard

Non-adjustable length up to 30500 mm custom

755

All dimensions are in millimeters (mm) unless otherwise specified.
