44 Series

Each 44 results from a free pour of molten aluminum into a large canister filled with rock-like modules of resin-impregnated sand, a waste product of conventional sand casting. Low voltage electricity is transmitted through the castings, allowing a light source to be suspended between them without using cables.

44 Series

Lamping

1.5w G4 LED

Material

Cast aluminum, braided metal coaxial cable, aircraft cable, electrical components, white powder coated canopy

Weight

Min. weight of 1 pendant = 2kg
Max weight of 1 pendant = 4.5kg
One lamp assembly = 1kg

Patent

US Patent # D776856
EU Patent # 002840975-0001-0003
