

twentieth

A matrix of hot glass is stretched and folded back onto itself numerous times as it cools. Air is trapped between the folds and stretched along the grain of the loop, creating microfilaments that give the piece a pearlescent optical quality. A light source is introduced at one end of the loop casting light through the microfilaments and registering a gentle gradient.

## Lamping

1.5w LED or 10w xenon

### Material

Pulled glass, braided metal coaxial cable, electrical components, and brushed nickel or white powder coated canopy.

### Patent

Worldwide patents pending
EU Patent # 03611144 - 0005-0009

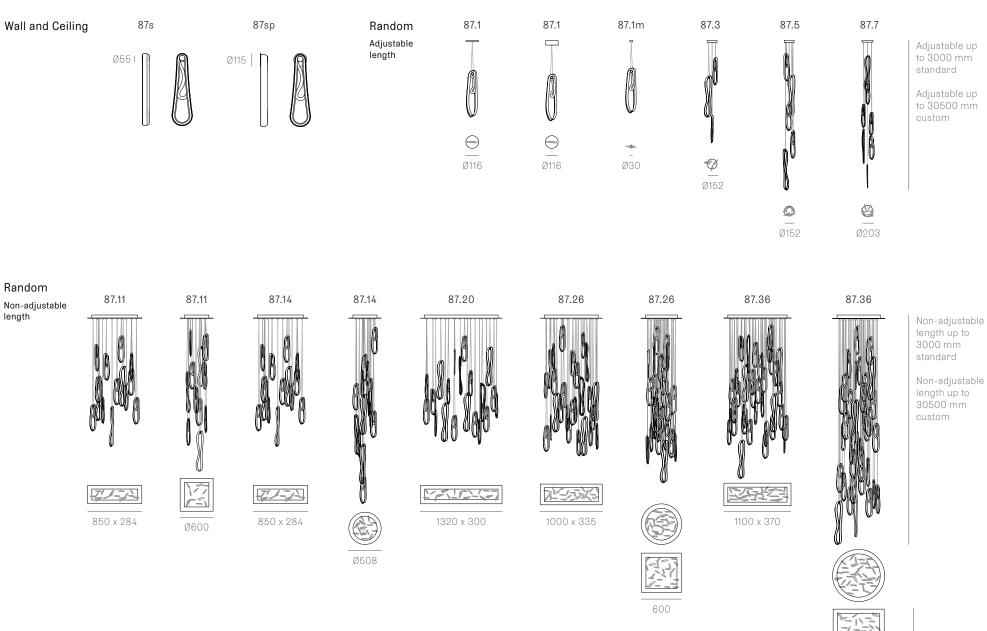

# 87 Series — Wall and Ceiling | Random

Adjustable length

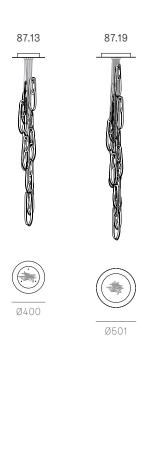

Ø152

Ø203

Non-adjustable length up to 3000 mm standard

Non-adjustable length up to 30500 mm custom

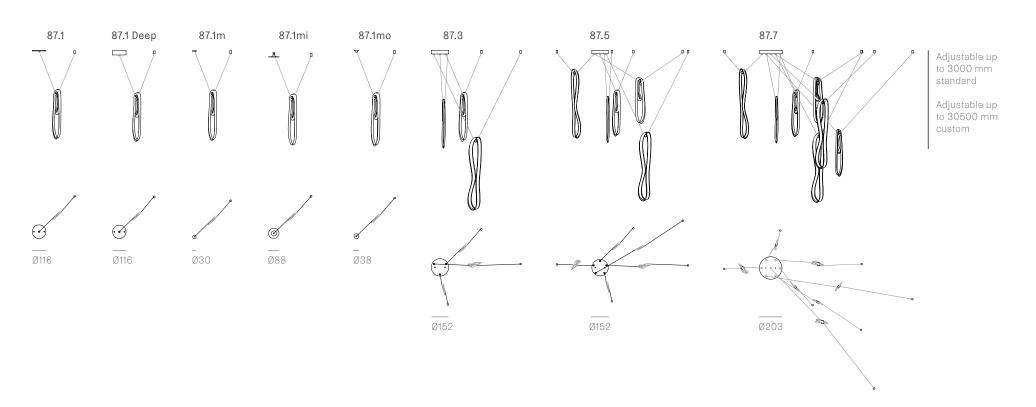

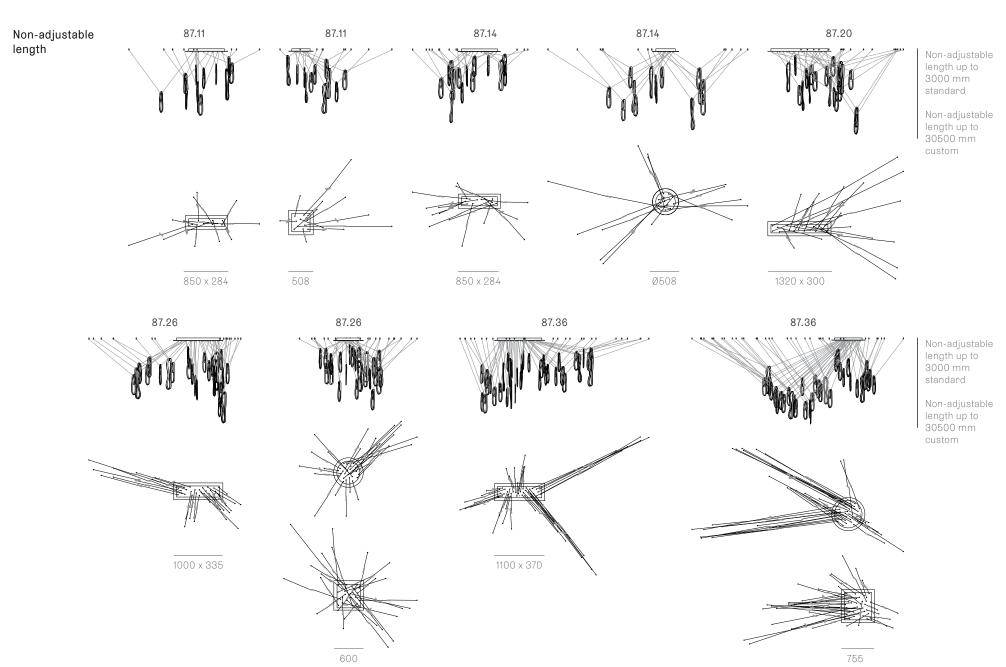

Ø707

## Adjustable length

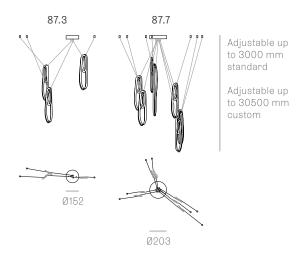

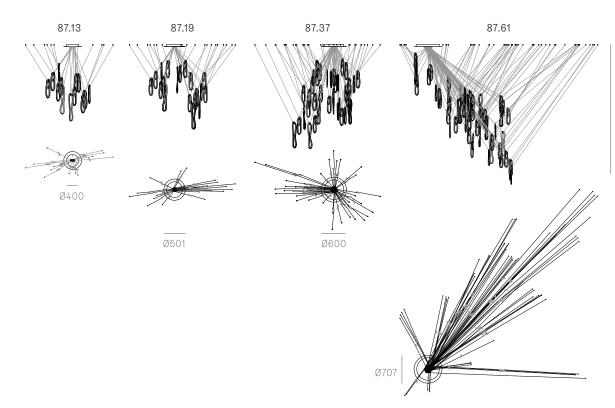

# Adjustable length

Non-adjustable length

Non-adjustable length up to 3000 mm standard

Non-adjustable length up to 30500 mm custom

87 Series — Cluster Column
