

skram

wooddrop

D06

Wooddrop is a stool/side table constructed of locally harvested, salvaged timber. The design juxtaposes rigid geometry with 'perfectly imperfect' cracks and checks that form as large pieces of timber naturally dry. Available materials vary; it is advised that customers contact a skram representative for current stock and lead time on materials listed below. Suitable for contract use. Custom options are available. Certain species and finishes may be suitable for protected or exposed outdoor use and clients interested in this option should contact skram for details.
